

# Green Materials Obtained by Geopolymerization for a Sustainable Future

Petrica VIZUREANU and  
Dumitru-Doru BURDUHOS-NERGIS

Monograph / PDF eBook DRM Free

Geopolymerization techniques allow the conversion of industrial waste materials into environmentally friendly materials.

*Keyword:* Geopolymerization, Industrial Waste Materials, Green Materials, Thermal Insulation, Fire-resistant Materials, Construction Materials, Refractory Linings, Cements and Concretes, Encapsulation of Radioactive Waste, Encapsulation of Toxic Waste, Thermal Power Plant Ash, Aluminosilicates Recycling, Porous Geopolymers, Environmentally Friendly Concrete

**ISBN 13:** 978-1-64490-113-7, **Publication Date:** 2021 (2/5/2021)

**Direct URL:** <https://www.mrforum.com/product/green-materials-obtained-by-geopolymerization>  
212 pages, PDF eBook DRM Free, USD 95.00

*Materials Research Foundations Vol. 90* / **BISAC:** TEC021000 / **BIC/Thema:** TGM

**Imprint:** Materials Research Forum LLC, *Publisher's sales rights are Worldwide*

Summary:

Geopolymerization techniques allow the conversion of industrial waste materials into environmentally friendly materials. The vast list of applications includes thermal insulation, fire-resistant materials, construction materials, refractory linings, cements and concretes, encapsulation of radioactive and toxic waste etc. The book presents the technological processes involved, as well as the characterization and applications of the resulting ecomaterials.
