

Bioinspired Nanomaterials for Energy and Environmental Applications

Eds. Alagarsamy Pandikumar and Perumal Rameshkumar

Monograph / PDF eBook DRM Free

The book presents recent advances in the synthesis of bioinspired nanomaterials and their applications in areas such as photocatalysis, electrocatalysis and photoelectrocatalysis, supercapacitors and solar cells.

Keyword: Bionanomaterials, Nanomaterial Synthesis, Green Synthesis, Metal Nanoparticles, Metal Oxide Nanostructures, Photocatalysis, Electrocatalysis, Photoelectrocatalysis, Energy-Related Electrocatalysis, Supercapacitors, Disinfection, Toxic Chemicals, Dye-Sensitized Solar Cells

ISBN 13: 978-1-64490-183-0, **Publication Date:** 2022 (4/15/2022)

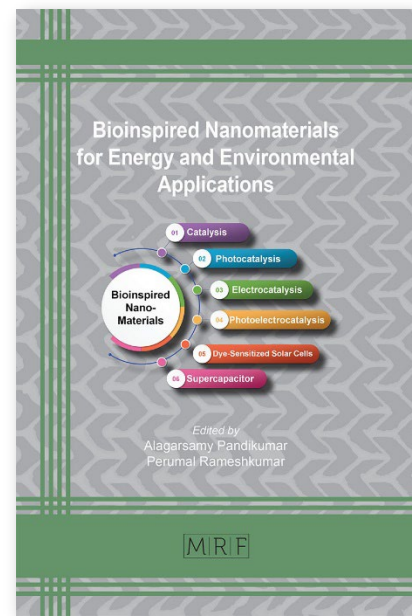

Direct URL: <https://www.mrforum.com/product/bioinspired-nanomaterials-II>
246 pages, PDF eBook DRM Free, USD 95.00

Materials Research Foundations Vol. 121 / **BISAC:** TEC021000 / **BIC/Thema:** TGM

Imprint: Materials Research Forum LLC, *Publisher's sales rights are Worldwide*

Summary:

The book presents recent advances in the synthesis of bioinspired nanomaterials and their applications in areas such as photocatalysis, electrocatalysis and photoelectrocatalysis, supercapacitors and solar cells. Specific topics include photocatalytic disinfection, degradation of toxic chemicals, energy conversion and energy storage.
